

Recycling Financial Incentive for Preble County Businesses

Offered by Preble County Solid Waste District

The Preble County Solid Waste District is offering a financial incentive for businesses intended to provide them with funding to improve or enhance their current recycling programs. The District will work with the Chamber of Commerce to provide up to \$500.00 in incentive funding to those businesses that desire to upgrade their current recycling efforts. The funding can be used to offset costs for contracts, recycling equipment, or containers. Some guidelines apply such as the business is required to enter into an agreement with the Solid Waste District, undergo two free waste audits to determine the status of existing waste disposal/recycling programs and the effectiveness of future programs that are put into place, and the business must participate in a short online recycling survey. For more information please contact Beth Wright, Assistant Director of Preble County Solid Waste District by calling 937-456-6880 or e-mailing to the following address: beth.wright@prebswmd.org. Business recycling is good for the planet and good for the budget of the business that embraces recycling as a basic program of operations.
